Summary

As a detail-oriented software engineer, I prioritize keeping up with emerging technologies to ensure that my solutions are both inventive and efficient. I am interested about creating effective solutions to real-world problems, with an emphasis on frontend development in JavaScript, React, and related technologies. I have expertise working in agile contexts and am proficient in web-based system development. My technical competence, along with good collaboration skills, enables me to adapt rapidly to new problems while delivering high-quality solutions.

Technical Skills

HTML, CSS, JavaScript, React, Next JS

Tailwind CSS, Bootstrap, Typescript, NodeJS

MongoDB, Postgre SQL, Rest API,

Postman, Figma, Scrum, Agile, Jira

Work Experience

Front-end Developer – Full Time – Boshhh – Manchester, UK

May 2024 – Present

As a Front-end Developer at Boshhh UK, I transform design concepts into functional code, utilizing Figma for design collaboration and React with TypeScript for development. My role involves ensuring that the website is both visually appealing and user-friendly, while maintaining high performance and cross-browser compatibility.

Freelance Web Developer – Part Time – Manchester, UK

October 2023 – May 2024

I have built Onboarding pages & Login pages for **Vulse.co** (*Tech Stack*: Next js, Typescript, Tailwind CSS)

Sales Assistant – Full-Time – Footasylum - Manchester, UK

November 2022 – May 2024

As a dedicated Sales Assistant at Footasylum, I excel in addressing and solving customer needs through attentive service and product knowledge. My role involves interacting with a diverse clientele, guiding them towards making informed purchasing decisions that align with their preferences and requirements.

Consistently provide high-quality customer service, ensuring a welcoming and helpful shopping experience. Skilled in quickly understanding customer needs and offering tailored solutions.

Front-end Developer – Full-Time – Bulutistan - Istanbul, TR

January 2021 – August 2022

Specializing in creating bespoke web solutions from concept to launch, with a focus on user-centric design, performance, and SEO optimization. I collaborate closely with clients to bring

their visions to life, ensuring their digital presence is both impactful and aligned with their business goals.

Utilized Figma to design intuitive and engaging user interfaces, setting the foundation for successful web development projects according to client specifications.

Implemented responsive and dynamic web applications using HTML, CSS, JavaScript, and React, enhanced with Next.js for optimal performance and SEO benefits.

Incorporated SEO best practices throughout the development process to enhance website visibility and search rankings, ensuring a competitive edge in digital spaces.

Practiced Agile and Scrum methodologies to maintain flexibility and adaptability in project management, ensuring timely delivery and iterative improvements based on client feedback.

Leveraged Tailwind CSS and Bootstrap to expedite development with modern, mobile-first designs that are both aesthetically pleasing and functional.

Education

Patika.dev - Web Developer Bootcamp

Kocaeli University – Business Administration (Bachelor Degree)

Projects

Ozdemir Law Firm - https://www.hukukozdemir.com/

The website serves as a digital front door for the firm, offering an extensive overview of the company's history and areas of expertise.

An intuitive 'Contact Us' feature with a message box, enabling potential clients to easily get in touch with the firm for consultations or inquiries.

Tech Stack: HTML, CSS, JavaScript, React, Next JS, Tailwind CSS, Email JS

Albion Journey - https://www.albionjourney.com/

Designed and developed Albion Online Hub, an immersive and interactive website dedicated to the vibrant community of Albion Online players. This platform is tailored to enhance the gaming experience by providing essential tools, resources, and a marketplace specifically for Albion Online enthusiasts.

Integrated sophisticated profit calculators that allow players to strategize and optimize their in-game earnings. These calculators cover various aspects of the game, including crafting, farming, and trading, enabling players to make informed decisions and maximize their profits.

A comprehensive guide repository where the website owner can create, edit, and delete guides.

A dynamic market section where players can list items for sale, facilitating in-game transactions within the community. The marketplace is designed to mimic the in-game economy, providing a platform for players to trade goods and services. Each listing includes detailed item descriptions, prices, and the option for buyers to get in touch with sellers directly.

Tech Stack: HTML, CSS, JavaScript, React, Next JS, Tailwind CSS, Mongo DB, Prisma

Kursat Keskin (My Portfolio Website) - https://kursatkeskin.com/

This website is designed to reflect my expertise, creativity, and the breadth of projects I've successfully delivered.

It serves as a digital testament to my dedication to crafting meaningful and impactful web solutions.

Tech Stack: HTML, CSS, JavaScript, React, Next JS, Tailwind CSS, Framer Motion, Email JS

Baby Memory Website - https://gunesozdemir.vercel.app/

Designed and developed a personalized and secure website to celebrate my nephew's 2nd birthday, creating a digital space where family memories are cherished and preserved. This website serves as a living scrapbook, capturing the joy and milestones of his early years, accessible exclusively to family members through a secure login system.

Designed an intuitive admin dashboard for the parents, granting them full control over the website's content and features.

This website is more than just a birthday celebration; it's a platform for family bonding, sharing, and preserving the precious early years of my nephew's life

Tech Stack: HTML, CSS, JavaScript, React, Next JS, Tailwind CSS, Mongo DB, Rest API
